

CHEMICAL PRODUCTS

INDUSTRIAL WATER TREATMENT PLANTS

CHEMICAL PRODUCTS

SAITA supplies a wide range of chemicals for the operation and maintenance of industrial water treatment plants. Chemical products and reagents studied in our R&D laboratory for specific applications in the field of water purification and recycling.

WASTEWATER TREATMENT

Products used in **chemical-physical** type plants for wastewater clariflocculation.

- Disemulsifying powders
- Carbon and calcium powder mix
- Flocculant powders
- Powder for sulfates abatement
- **New** powders for Boron abatement
- Liquid coagulants
- Liquid flocculants
- Polyamines
- Liquid de-complexants

OPERATION AND MAINTENANCE

Specific products for the operation and cleaning of: **vacuum evaporators**, membrane filtration systems and **closed circuits**.

- Antifoam
- Antifoam silicone free
- Antiscalants
- Anti-corrosives
- Biocides
- Acid, alkaline and neutral cleaners
- Descaling agents

FILTRATION MEDIA

Media for the maintenance and operation of **ion exchange** demineralizers and **multi-media** filtration systems.

- Granular activated carbon
- Ion exchange resins
- Quartz sand
- Zeolite
- Pyrolusite and birm
